Greetings Ana et al,

Both CalEPA and OSPR stand ready, as needed and desired, to assist the development of an Incident Command System compatible organizational structure to support the Exide effort.

Please contact me to discuss further.

Regards,

Paul

Subject: Exide

Hi Ana – nice to see you again today.

One thought occurred to me regarding the action item to socialize the two organizational structures that were discussed today. DTSC and Cal/EPA have formed an interagency group, the ERMAC, that may be of use to the Exide effort. The Emergency Response Multi-Agency Coordination Group (ERMAG) consists of a number of BDOs and other California agencies, some of whom have deep experience with ICS and might be able to help with putting a structure together that meeting the management and policy objectives.

I am ccing Paul Penn on this email as Paul has been a key voice on the ERMAG for a number of years. So you might want to check in with Paul as you think about what structure will best serve all of the needs.

Best regards, Dan Meer
